

ENGINEERING AND CAPITAL PROJECTS

HERITAGE ROAD BRIDGE REPLACEMENT PROJECT CROSSING THE OTAY RIVER - MAIN STREET TO ENTERTAINMENT CIRCLE

STM 386 BRLS 5203(039)

PROJECT NEED

This segment of Heritage Road and the interim wood deck bridge over the Otay River does not accommodate the projected traffic between the developing Otay Ranch and the Otay Mesa Community, pedestrians, cyclists or flooding from a 100-year storm event. This project will relieve projected traffic volumes, provide a crossing for cyclist, pedestrians and equestrians (under the bridge), and accommodate a 100-year storm event.

PROJECT FEATURES

- Construct new 454' long bridge over the Otay River with six through-lanes with 2-lane median for left turn lanes at Main Street.
- Reconstruct roadway approaches between Main Street and Entertainment Circle and modify intersection of Main Street.
- The bridge and approaches will be wide enough to accommodate a median, bicycle lanes and sidewalks.
- The bridge will allow a 100 -year storm event to pass and accommodate a multi-use trail (including equestrians) under the bridge.
- Install traffic signals at Heritage Road / Main Street and Heritage Road / Entertainment Circle North

CONSTRUCTION COST + FUNDING

Bridge and Street Improvements: \$20 to \$25 million, funded by Transportation Development Impact Fees (TDIF) from Chula Vista and San Diego and Federal Funds from the Highway Bridge Program.

PROJECT MANAGER

City of Chula Vista: Jose Luis Gomez, P.E., P.L.S.
Ph. No.: 619-476-2301

PROJECT SCHEDULE

- Environmental clearances Complete: CEQA & NEPA June 2017.
- Final Project Design: January 2022.
- Permits & Right of Way: January 2022.
- Bridge and Roadway Construction: Summer 2022.
